INTRODUCTION

The Energy Research Information System (ERIS) is a service administered by the Old West Regional Commission in response to the need for current information on research activities in the region's rapidly growing and changing field of energy. Cooperating with the Commission on ERIS are the U.S. Geological Survey and Argonne National Laboratory.

The purpose of ERIS is to compile and make available to the users in the Region an up-to-date inventory of ongoing and recently completed energy-related research projects.

The term "energy-related" covers a broad spectrum of activities and encompasses a large volume of research. Nonetheless, ERIS attempts to report energy-related research projects in as comprehensive a manner as possible. The subject areas covered are: reclamation, energy conversion, and land use research, socioeconomic impact and renewable energy resources studies, as well as programs related to energy development which do not necessarily involve research.

By facilitating communication among researchers and allowing public and private sector decision-makers access to Regional energy research, ERIS aims to improve information exchanges among energy research users. The system can be used as an aid in conducting research, avoiding duplication of effort, and pinpointing areas of additional research need.

The geographical focus of ERIS is the Old West Region--Montana, Nebraska, North Dakota, South Dakota, and Wyoming. However, peripheral states or nationwide efforts are covered as they are related to regional work.

The compilation of energy research projects in the ERIS reports has been accomplished by combining ERIS's own information-gathering efforts with those of other clearinghouses--most notably, Oak Ridge National Laboratory, the Smithsonian Science Information Exchange, the Montana Energy Office, the North Dakota Regional Environmental Assessment Program, the University of Wyoming, Rocky Mountain Institute on Energy and Environment and other energy agencies in the Old West Region.

Use of the Energy Research Information System

ERIS Projects Reports

ERIS information is stored in a computerized data base. As the data base grows, periodic reports are printed which list the latest contents of the data base. The first such report was issued in November, 1975.

Access to ERIS is available through subject oriented sections and through the indexes located at the end of the listings. These indexes are: Location, Personal Name, Organization, and Subject Keyword. Instructions for the use of the indexes precede each section.

Please note that ERIS provides a listing but not the actual document referred to in the publication section of each abstract. Document delivery is best accomplished by contacting the local library system or by contacting the investigator or sponsor of any particular project.

IV

All ERIS listings are available from the ERIS staff or from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161.

Computer Search Service

The holdings of ERIS are computerized, allowing for flexibility in conducting special searches of the data base. The computer search service is offered as a complement to the ERIS Projects Reports. If your inquiry concerning energy research cannot be answered by manual use of the reports, contact a member of the ERIS staff and request that a special search be conducted.

Cumulative Indexes

The cumulative indexes provided in this Projects Report make reference to project information in the two Reports printed previously this year. The three Projects Reports of Volume 3 comprise a set of information; previous issues should not be discarded.

For your information in using the Cumulative Indexes, please note the following:

-Projects Report, Volume 3, No. 1 (August 1978) contains project numbered 000001081 to 00001224.

-Projects Reports Volume 3, No. 2 (December 1978) contains projects numbered 00001225 to 00001362.

The Old West Regional Commission is a Federal-State partnership designed to address regional economic problems and stimulative orderly economic growth in the states of Montana, Nebraska, North Dakota, South Dakota and Wyoming. Established in 1965 under the Public Works and Economic Development Act of 1965, it is one of eight such commissions in the United States.

The Land Reclamation Program at Argonne National Laboratory is conducting coordinated applied and basic research into the physical and ecological problems of land reclamation related to surface mining of coal and developing cost-effective techniques for reclaiming/rehabilitating mined coal land to productive end uses. The purpose of this program is to conduct integrated research and development projects focused on near- and long-term reclamation problems in all major U.S. coal resource regions including Alaska and to coordinate, evaluate, and disseminate the results of related studies conducted at other research institutions.

The function of the Water Resources Division of the Geological Survey is to provide data and reports on the availability and quality of water required for conversion of coal and oilshale to other forms of energy, to monitor the effects of mining and related developments on regional water systems, and to conduct investigations and research in methods of measuring and predicting the effects of mining and associated operations on local and regional water users.

HOW ERIS IS ORGANIZED

- o PROJECTS REPORTS (formerly called Quarterly Reports) contain descriptions of energy research in the Old West Region.
- o Each REPORT is indexed according to Location, Name, Organization, and Subject.

- o CUMULATIVE INDEXES are provided once a year to incorporate previous indexes of the year's PROJECTS REPORTS under one cover.
- o Project descriptions are not included with the Cumulative Index.
- o CUMULATIVE INDEXES and the year's PROJECTS REPORTS comprise a set of information.

REPORTING FORM ENERGY RESEARCH INFORMATION SYSTEM Old West Regional Commission

INSTRUCTIONS: Please complete the relevant categories of the Reporting Form for each energy-related project currently being conducted or recently completed by your organization in the States of the Old West Region. If an umbrella project covers several separate studies, fill out a form for each one, as well as for the umbrella project. If you want any of the information you provide to be omitted from ERIS publications, make a note of this in Category 17, "Special instructions for Proprietary information."

In order to assist us in assigning keywords for computer access to your research information, we ask that you circle the most descriptive words and phrases of the Title and Abstract. If necessary, add additional terms of your own choosing.

If you are amending previously submitted information, please note this on the Reporting Form.

PLEASE RETURN COMPLETED REPORTING FORM(S) TO: ERIS, OLD WEST REGIONAL COMMISSION, 228 HEDDEN-EMPIRE BLDG., BILLINGS, MT 59101. PHONE: (406) 657-6665 (Commercial) or 585-6665 (FTS).

SUBJECT INDEX

THE TERMS LISTED IN THE SUBJECT INDEX ARE
TAKEN FROM THESAURI OF ENERGY DESCRIPTORS
AND SUPPLEMENTED BY TERMS FROM THE TITLE
AND ABSTRACT OF THE PROJECT DESCRIPTION.

IN ADDITION, THE SUBJECT INDEX CONTAINS
LOCATION NAMES SUCH AS CITIES, COUNTIES,
MINE SITES, RIVER BASINS, AND GEOGRAPHIC
FORMATIONS. STATE LOCATION NAMES CAN BE
FOUND IN THE CUMULATIVE LOCATION INDEX.
